**Avoid the Pre-Wash and Re-Wash
With Maytag® Jetclean® II and Jetclean® III Dishwashers**

Maytag Celebrates 40 Years of Dependable Dishwashers

BENTON HARBOR, Mich. (June 20, 2007) – The dependable Maytag® Jetclean® II and Jetclean® III dishwashers are built to provide thorough, no-fuss cleaning every time. The Maytag Jetclean system uses more active spray jets than any other leading brand dishwasher¹. The most powerful motor² along with the finest filtration¹ eliminates the chore of pre-washing dishes and the frustration of food residue. Jetclean II and Jetclean III also offer an extra-large washtub with the capacity to accommodate up to 14 place settings, while still fitting into the space of a standard dishwasher.

Avoiding pre-washing and re-washing dishes can be a significant advantage, especially for larger families or when entertaining. In a recent Maytag survey, respondents said the top five reasons they re-wash their dishes are to remove “film” residue on glassware; spots on glasses, silverware and plates; hard water deposits; un-removed food soil; and re-deposited food soil.³

“Since the introduction of the first Maytag dishwasher 40 years ago, families have depended on the Maytag brand to offer dishwashers that fit their needs,” said Audrey Reed-Granger, director of public relations for Maytag brand. “With Jetclean II and Jetclean III they’ll continue to enjoy the benefits of consistent and powerful, trouble-free cleaning.”

The Maytag Jetclean II has two racks, while the Jetclean III features three dish racks. The third rack in the Jetclean III provides new space in the bottom of the dishwasher to hold odd-shaped dishes like casserole dishes, baking pans and frying pans—and provides excellent cleaning performance throughout all three levels. All Jetclean models feature extra durable, heavy duty stainless steel racks, and a top rack that can be removed to accommodate oversized items in the lower rack. Some Jetclean models also feature an adjustable upper or middle rack for customized arrangement of each load.

Powerful cleaning performance

Built strong for lasting reliability, the Maytag Jetclean dishwashers deliver an uncompromising level of strength and performance regardless of the load size or soil level. The dishwasher features intuitive technology such as the PrecisionClean™ turbidity sensor that detects food soil, detergent, rinse aid and temperature, and adjusts to deliver optimum washing and rinsing action. Plus, the Maytag Jetclean Seal of Silence™ sound barrier means your dishes get clean while your home stays quiet.

The Maytag Jetclean dishwashers provide dependable cleaning performance:

- **The most powerful motor²:** 1/3 HP Jetclean Power Module motor generates high water pressure for optimal cleaning.
- **The most active spray Jets¹:** Jetclean dishwashers use more jets than any other leading brand, removing even the toughest food particles time after time.
- **The finest filtration¹:** With micro-fine filtration, even miniscule particles such as poppy seeds or coffee grounds are captured, preventing them from being re-deposited onto dishes.
- **The largest food chopper¹:** Stainless steel internal hard food chopper pulverizes food so it can be filtered out and not re-deposited on dishes.

Maytag Jetclean dishwashers range in suggested retail price from \$399 to \$999 based on wash cycles, tub interiors, number of racks, touch pad options and colors. Maytag Jetclean II dishwashers are available at appliance centers and home improvement stores throughout the United States.
