### **Maytag® Centennial® Top-Load Washer and Dryer: Maytag® Commercial Technology Demonstrates Brand's Durability and Dependability**

- Maytag® Centennial® top-load washers and dryers are now offered in an Oxide color and with the option of a scratch- and shatter-resistant window in the washer lid.
- From the heavy-gauge steel lid to the Dependable Clean™ wash system and Smooth Balance™ suspension, the Centennial line of washer and dryers offer uncompromising, Maytag® Commercial Technology that withstands the test of time.

#### **Washer Features:**

A commercial-grade transmission uses synthetic oil and tests to twice the life of standard washer transmissions.

A large, one-half horsepower drain pump provides years of trouble-free draining. A rubber impeller protects the pump against nails, loose change and other debris.

The commercial-grade stainless steel wash basket resists stains, odor and scratches to protect fabrics from snagging or pilling.

The suspension system and solid steel base frame work to minimize vibration during wash and spin cycles.

#### **Dryer Features:**

The Smooth Balance™ suspension system has rollers that are permanently lubricated and work with front drum glides for quiet operation and low vibration. The dryer also contains two, 360-degree heat seals that insulate the drum for more efficient drying.

The GentleBreeze™ drying system quickly and efficiently dries clothing in a counterclockwise loop, delivering more consistent drying results.

A DuraCushion™ dryer drum provides years of dependable tumbling with less friction and wear, allowing clothes to gently glide off its surface without snagging.

#### **Performance:**

The LoadFlex™ agitator, rinse cycles and drain work together in a Dependable Clean™ wash system that cleans clothes right the first time – even clothes with tough, ground-in dirt – for reliable cleaning, wash after wash.

SuperSize Capacity Plus ensures that the dryer is large enough to easily and effectively dry an entire load from the washer. A commercial grade, steel-reinforced base frame provides added support to all key components, even while drying heavy loads.

#### **Price/Availability:**

Maytag Centennial top load washers range in price from \$479 to \$699; Centennial dryers are available in gas and electric models and range from \$449 to \$679 for electric models, and \$519 to \$749 for gas models. They are available at home improvement stores and appliance retailers throughout the United States. [www.maytag.com](http://www.maytag.com).
